Chapter 1: Close Reading

Reading closely means slowing down enough to notice how an argument is built. Good readers ask questions of the text, mark what surprises them, and return to difficult passages with fresh eyes. Marginal notes turn passive reading into a conversation with the author, and over time those notes become a map of what you know. Reading closely means slowing down enough to notice how an argument is built. Good readers ask questions of the text, mark what surprises them, and return to difficult passages with fresh eyes. Marginal notes turn passive reading into a conversation with the author, and over time those notes become a map of what you know. Reading closely means slowing down enough to notice how an argument is built. Good readers ask questions of the text, mark what surprises them, and return to difficult passages with fresh eyes. Marginal notes turn passive reading into a conversation with the author, and over time those notes become a map of what you know. Reading closely means slowing down enough to notice how an argument is built. Good readers ask questions of the text, mark what surprises them, and return to difficult passages with fresh eyes. Marginal notes turn passive reading into a conversation with the author, and over time those notes become a map of what you know. Reading closely means slowing down enough to notice how an argument is built. Good readers ask questions of the text, mark what surprises them, and return to difficult passages with fresh eyes. Reading closely means slowing down enough to notice how an argument is built. Good readers ask questions of the text, mark what surprises them, and return to difficult passages with fresh eyes. Marginal notes turn passive reading into a conversation with the author, and over time those notes become a map of what you know. Reading closely means slowing down enough to notice how an argument is built. Good readers ask questions of the text, mark what surprises them, and return to difficult passages with fresh eyes. Marginal notes turn passive reading into a conversation with the author, and over time those notes become a map of what you know. Reading closely means slowing down enough to notice how an argument is built. Good readers ask questions of the text, mark what surprises them, and return to difficult passages with fresh eyes. Marginal notes turn passive reading into a conversation with the author, and over time those notes become a map of what you know. Reading closely means slowing down enough to notice how an argument is built. Good readers ask questions of the text, mark what surprises them, and return to difficult passages with fresh eyes. Marginal notes turn passive reading into a conversation with the author, and over time those notes become a map of what you know. Reading closely means slowing down enough to notice how an argument is built. Good readers ask questions of the text, mark what surprises them, and return to difficult passages with fresh eyes. Marginal notes turn passive reading into a conversation with the author, and over time those notes become a map of what you know. Reading closely means slowing down enough to notice how an argument is built. Good readers ask questions of the text, mark what surprises them, and return to difficult passages with fresh eyes. Marginal notes turn passive reading into a conversation with the author, and over time those notes become a map of what you know. Reading closely means slowing down enough to notice how an argument is built. Good readers ask questions of the text, mark what surprises them, and return to difficult passages with fresh eyes. Marginal notes turn passive reading into a conversation with the author, and over time those

notes become a map of what you know. Reading closely means slowing down enough to notice how an argument is built. Good readers ask questions of the text, mark what surprises them, and return to difficult passages with fresh eyes. Marginal notes turn passive reading into a conversation with the author, and over time those notes become a map of what you know. Reading closely means slowing down enough to notice how an argument is built. Good readers ask questions of the text, mark what surprises them, and return to difficult passages with fresh eyes. Marginal notes turn passive reading into a conversation with the author, and over time those notes become a map of what you know. Reading closely means slowing down enough to notice how an argument is built. Good readers ask questions of the text, mark what surprises them, and return to difficult passages with fresh eyes. Marginal notes turn passive reading into a conversation with the author, and over time those notes become a map of what you know. This sentence deliberately crosses the page break so that a highlight must span two pages without losing its place. Reading closely means slowing down enough to notice how an argument is built. Good readers ask questions of the text, mark what surprises them, and return to difficult passages with fresh eyes. Marginal notes turn passive reading into a conversation with the author, and over time those notes become a map of what you know. Reading closely means slowing down enough to notice how an argument is built. Good readers ask questions of the text, mark what surprises them, and return to difficult passages with fresh eyes. Marginal notes turn passive reading into a conversation with the author, and over time those notes become a map of what you know. Reading closely means slowing down enough to notice how an argument is built. Good readers ask questions of the text, mark what surprises them, and return to difficult passages with fresh eyes. Marginal notes turn passive reading into a conversation with the author, and over time those notes become a map of what you know. Reading closely means slowing down enough to notice how an argument is built. Good readers ask questions of the text, mark what surprises them, and return to difficult passages with fresh eyes. Marginal notes turn passive reading into a conversation with the author, and over time those notes become a map of what you know. Reading closely means slowing down enough to notice how an argument is built. Good readers ask questions of the text, mark what surprises them, and return to difficult passages with fresh eyes. Marginal notes turn passive reading into a conversation with the author, and over time those notes become a map of what you know.

Two-column layout

Reading closely means slowing down enough to notice how an argument is built. Good readers ask questions of the text, mark what surprises them, and return to difficult passages with fresh eyes. Marginal notes turn passive reading into a conversation with the author, and over time those notes become a map of what you know. Reading closely means slowing down enough to notice how an argument is built. Good readers ask questions of the text, mark what surprises them, and return to difficult passages with fresh eyes. Marginal notes turn passive reading into a conversation with the author, and over time those notes become a map of what you know. Reading closely means slowing down enough to notice how an argument is built. Good readers ask questions of the text, mark what surprises them, and return to difficult passages with fresh eyes. Marginal notes turn passive reading into a conversation with the author, and over time those notes become a map of what you know. Reading closely means slowing down enough to notice how an argument is built. Good readers ask questions of the text, mark what surprises them, and return to difficult passages with fresh eyes. Marginal notes turn passive reading into a conversation with the author, and over time those notes become a map of what you know. Reading closely means slowing down enough to notice how an argument is built. Good readers ask questions of the text, mark what surprises them, and return to difficult passages with fresh eyes. Marginal notes turn passive reading into a conversation with the author, and over time those notes become a map of what you know. Reading closely means slowing down enough to notice how an argument is built. Good readers ask questions of the text, mark what surprises them, and return to difficult passages with fresh eyes. Marginal notes turn passive reading into a conversation with the author, and over time those notes become a map of what you know. Reading closely means slowing down enough to notice how an argument is built. Good readers ask questions of the text, mark what surprises them, and return to difficult passages with fresh eyes. Marginal notes turn passive reading into a conversation with the author, and over time those notes become a map of what you know. Reading closely means slowing down enough to notice how an argument is built. Good readers ask questions of the text, mark what surprises them, and return to difficult passages with fresh eyes. Marginal notes turn passive reading into a conversation with the author, and over time those notes become a map of what you know.
